DETAILED ACTION

Response to Arguments

Applicant's arguments filed 1/23/06 have been fully considered but they are not persuasive.

Regarding the objection to the specification for having embedded hyperlink. The amendment does not remove the hyperlinks as applicant asserted in the argument. The amendment deletes texts and replaces them with the identical texts.

Regarding the 35 U.S.C 103 rejection, Applicant argued that the Farrell in combination with Leong and Pegrum do not teach receiving configuration files from a capacity planning server. The argument is not persuasive because Farrell teaches providing configuration from a 'capacity planning server'. (See col.5 lines 24-34, fig.21 and fig.22). Farrell discloses Internet service providers use the aggregated data for capacity planning (col.5 line 30). Hence, any server in Farrell that provides the configuration files is a 'capacity planning server' or part of the 'capacity planning server' as claimed.

The specification remains objected to because it contains embedded hyperlinks as stated in the prior office action.

Claim 10 remains rejected under 35 U.S.C. 103 as stated in the prior office action.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
